

## MAUNA LANI RESORT

Aloha,

While our hearts go out to those affected by the Kilauea Volcano activity, Mauna Lani Resort is thankfully unaffected by the volcano. Mauna Lani is located more than 75 miles from the Kilauea Volcano. There is absolutely no reason for current or future guests to change their travel and vacation plans to Mauna Lani.

A few helpful notes from the experts:

- The Kilauea Volcano is located on a remote area on the island of Hawaii's east side. Of the island's 4,028 square miles, less than 2% of the island is impacted by the Kilauea Volcano.
- Air Access: All flights into the Ellison Onizuka Kona International Airport and Hilo International Airport are operating normally.
- Air Quality: The air quality on the Kohala Coast remains clean and safe. Officials are monitoring air quality near where the lava is flowing, and in those localized areas.

Please contact us if we may assist you with your reservation or answer any questions you may have. 800.367.2323
